

Dear Mr. Wells,

I would like to apply for the position of Graduate Mechatronics Engineer advertised in this month's Robotics magazine. Please see my curriculum vitae in the enclosed.

I have been working as robotic engineer for 2 years in Farmacon International GmbH by now. Before that, I have been an apprentice technician for 4 years.

I must say that I've reached some significant goals while working in Farmacon International. I've designed a robot that can safely work with a human.

Having gained valuable professional experience in Germany, I am now fully prepared and excited to relocate to the UK for employment.

I look forward to your response.

You sincerely,
Hans Fischer
